Newest and latest news.

We have been doing a lot of back end fixes and making the site is working OK. We have also been creating accounts and setting them up so that people can publish content. Look out for updates from the Woodville revival service's in Adelaide from April. We will be putting up more photos but they may not be that flattering as they will be ones we have chosen as people haven't heeded my warning that photos received may be more flattering than photos posted from my collection .

We will also be posting some mini bible studies soon so keep an eye out for them and you might also want to learn about RSS so you know when the site is updated but we will also post in here about RSS.
